HYBRID

THE AiOX HYBRID

Welcome to the world of flexibility and unlimited variety. No cutting machine in the framing industry offers as many creative applications and possibilities as the Hybrid version of the GUNNAR AiOX product family. Swiss quality and precision for every picture framer. That's our promise.

MAIN APPLICATIONS

Individual custom frame shops and framing businesses that need precision, simplicity, limitless creativity and efficiency.

PRODUCT CHARACTERISTICS

- Patented and unique Hybrid cutting head technology for 45° and 90° cuts with corresponding fully automatic cutting operation
- Fully automatic, dynamic blade depth adjustment for all board thicknesses
- No tool changes and absolutely no other manual manipulation, just complete mat production, even for double and triple mats, including inside and outside cuts
- Automatic depth control to make V-grooves and decorative cuts in one uninterrupted process
- Cutting edge-to-edge maximizes mat board usage with unique button finger clamps, and it can be equipped with the optional vacuum bed
- Tool-less blade change in seconds, includes basic scoring tips for boxes and debossing mat board
- Guaranteed precise cut results for all boards up to 3.5 mm in thickness
- Simple and intuitive operation with our comprehensive and in-house developed GMC operating software
- Revolutionary modular, compact and modern system design and completely flat table
